# Working Group 1 Topic

- Follow up on country AAs and IPs and the role of SE4All:
  - Pipeline of projects
  - **Processes required**
  - Private sector supply chain
  - Private sector investors
  - Available funding mechanisms/toolkits, using AAs and IPs as a steer for mobilisation of further funding
  - Investment fora
  - Matchmaking/marketplaces
  - Involvement of high-level fora, e.g. SE4All Advisory Board
  - High-impact opportunities
  - Modalities for forging the required PPPs

Simplified  
DRAFT

## Suggested topics for discussion

1. What funding mechanisms are available to support the AA/IP implementation and how can these systematically respond to priorities identified in AAs/IPs?
2. How to effectively link demand (as expressed in SE4All AAs and IPs) with supply (available instruments)? What is required to implement recommendations made previously?
3. Could there be some sort of syndication process led by the country with support of a partner (“lead arranger”) mobilizing support for AA/IP implementation? What should be the *modus operandi* for such process?
4. How to flock SE4All IPs to potential investors? How can we use market places, such as the IRENA Sustainable Energy Market Place to mobilize investments for IPs?
5. How can the SE4All HIOs and the energy efficiency accelerators in concrete terms support the implementation of SE4All AAs and IPs?

**Output: Actionable recommendations**

Backup slides to follow

As of 03 February 2016 3 IPs have been released for publication. They vary a lot.

- Gambia
  - 18 projects, of which 3 are high priority
- Tanzania
  - 3 programmes and 42 projects
- Myanmar (access only)
  - 1 large project only (National Electrification Plan)
- *Tools to handle the growing portfolio (pipeline) of projects must be rather flexible*
